SAT., MARCH 26, 1977

12:30 P.M.

Wells Commissions Co.
Fremont, Nebraska

General Information

TIME -- The Sale will be held Saturday, March 26, 1977, beginning at 12:30 P.M. sharp.

LOCATION -- Wells Commission Co., 500 S Main, Fremont, Nebraska. Phone 402/721-5514 Sale Day.

TERMS -- The terms of this sale are cash.

GUARANTEE -- All cattle sold in this sale will sold under the standard guarantee endorsed by the American Shorthorn Breeders Association as shown at the back of this book.

Announcements from the auction box will take precedence over printed matter in the catalog.

Where footnotes appear in this catalog, they were written from information supplied by the owners.

LIABILITY -- We shall not be liable for any accidents that may occur but will make every effort to provide for the safety and comfort of those attending. Accidents at cattle sales are rare, but all attending must do so at their own risk. The guarantee and terms shall constitute a contract between the buyer and seller of each lot. The sale manager is retained for specific tasks promotional and clerical, and has nothing to do with the handling of the cattle or the condition of the premises. Neither the sale manager, clerk, nor auctioneer can assume any liability.

Up until a few days ahead of the sale we invite you to inspect these cattle at the farm, two miles east of Schuyler on Highway 30.

BIDS -- Those wishing to buy, who cannot be present, can send their bids to Dick Kane, Auctioneer, Wisner, Nebraska; Ted Aegerton, Shorthorn Country, 8288 Hascall St., Omaha, Nebraska 68124, Phone: 402/393-7200; Harold Griepentrog, Schuyler, Nebraska 68661, Phone: 402/352-3781; Gene Fitzgerald, Nebraska Farmer, P.O. Box 81208, Lincoln, Nebraska 68501, Phone: 402/489-9331.

Herd has been performance tested since 1957. Herd sires with superior official 140 day performance test records have been used since 1965.

Standard Guarantee

A--Proper care must be given by purchaser to protect breeding qualities and health of guaranteed animals.

B--All bulls are guaranteed breeders provided they are not allowed to serve when under 14 months of age, or allowed to run with the herd under 20 months of age. In case of failure of a bull to be a breeder, notice shall be given to the seller within six months of date of purchase, or by the time the bull is 20 months of age, if purchased under 14 months of age.

C--With the exception of heifers sold under 14 months of age, all females are guaranteed breeders. Heifers under two years of age shall not be served by a heavy or old bull. Cows or heifers sold as bred, or safe in calf, not proving to be in calf must be reported to the seller within three months after date of sale. Females over 14 months of age sold open, not settling within six months after date of sale, shall be promptly reported to seller. Cows sold with calves at foot are considered breeders and no further guarantee is given.

D--When an animal fails to comply with the above guarantee, the seller has the option of substituting an animal of equal value to the satisfaction of the purchaser, or of having the animal returned for a trial for a period not to exceed six months. In case of dispute the return of the full purchase price, without interest, to the buyer will be considered full settlement and satisfaction to all claims. No charge for feed or maintenance shall be made by either buyer or seller. Salvage shall go to the seller. It shall be understood that the same guarantee given for the first animal shall likewise apply to any animal later substituted.

E--In the event an animal is returned by the buyer to the seller as a non-breeder the buyer must furnish to the seller a veterinarian's certificate showing that his herd is healthy as such a certificate is required by the seller.

F--All animals catalogued have been tested for T.B. and are clean, and have also passed a test for Brucellosis thirty days prior to the sale, or are accompanied by Bangs Vaccination Certificate. Announcements will be made covering animals not clear from vaccination.

G--Certificates of registry and transfer will be furnished with each animal sold. A signed application for unborn calves should be furnished with bred females showing names and record numbers of sire and dam, as well as service date. This applies to registered animals only.

H--All prospective buyers should check health requirements of their states. Health certificates will be provided with each lot sold.

SHIPPING ARRANGEMENTS: It is the obligation of the consignors and this association to see that all cattle are properly loaded on cars or trucks as directed by the buyers for shipment. Cattle will be at buyer's risk as soon as bid off, but every precaution will be taken to see that animals are cared for properly.

BE SURE TO LEAVE DEFINITE SHIPPING INSTRUCTIONS AND CORRECT TRANSFER INFORMATION WITH THE SALES CLERK.

Story

The reason for having this production sale is very simple. The heifer calves have been retained each year and the herd has grown too large for next summer's pastures. So on March 26, 1977, we will share with you the results of 30 years of breeding.

The herd was started with the purchase of one open heifer at a sale conducted by the Nebraska Shorthorn and Polled Shorthorn Association. This heifer died the following year, but another beginning was made a couple of years later. There have been some great changes in the past 30 years, and also in the type of our operation. For many years our goal was to produce the best show cattle possible, this included steers and heifers for the Junior Exhibitors. This changed about ten years ago with the purchase of a bull from the Eastern Nebraska Beef Cattle Testing Station's first bull sale. Since that time the emphasis has been placed on cattle that will gain as rapidly and economically as possible. This is being accomplished through the use of sires with superior performance test records. For there is a direct correlation between the rate of gain of a bull on the test and the rate of gain of his progeny. I became convinced of the truth of this statement while working at the Eastern Nebraska Beef Cattle Testing Station, for many times the top gaining bulls were sired by bulls with outstanding Test Station records. I also noticed that certain cows are more apt to raise these superior gaining bulls. That is why S V Viking Radium G was used in the herd. That is why Mina 22nd was purchased in 1973 at the Otto Johnson Dispersion Sale. She is the dam of S V Max x and also S V Mr. M B, a yearling bull that was used on ten heifers last year.

Our goal now is to produce cattle that will gain as rapidly and economically as possible up to 1100 pounds and grade choice. Much improvement along this line has been made. This has been verified by Bull Testing Station records and the 1976 American Shorthorn Association Sire Testing program where the calves sired by Mitchlett Radium 3rd were first in rate of gain and feed conversion efficiency in the 98 day Feedlot Test.

It wasn't easy to decide which cattle to offer in the sale. After much thought it was decided that the fairest way was to offer all the females in certain age groups. So this sale includes all the females between the age of four and eight, which is the prime years of a cow's life, and a good portion of the twos and threes. All the yearling heifers and most of the 1976 heifer calves are being kept, along with the herd sires, for I do not intend to quit the business for a few years, even though I have reached the age where I would like to have more time for myself. You can see that the cattle offered in the sale and the calves, the cows are carrying, are the same ones that produced the cattle that I intend to continue with, so you can buy them with confidence. If they did not produce and multiply this sale would not be possible.

The cattle market in February, 1977, leaves a lot to be desired, but this looks like the time to invest in breeding cattle and get ready for the profitable market we should see in the not too distant future. The total cow herd numbers of the country is below what we were told would be necessary to balance supply and demand. According to the January 1, 1977 USDA report total beef cow numbers are nine percent less than two years ago. Heifers over 500 pounds kept for beef replacements are down 26.2%. Heifers fed for market are up 23.7%. The 1976 calf crop was six percent less than the year before. So it looks like there will be an improved market when the large calf crop of two years ago is finally marketed and moisture and feed conditions improve to slow up the marketing of cows and other non-fed beef for it is only a matter of time until the demand will exceed the supply. People are consuming beef in larger quantities than ever before.

Reference Sire Ar-Su-Lu Meterman

Sire of Lots 1 to 4. One of the first bulls performance tested at the Eastern Nebraska Beef Cattle Testing Station. Rate of gain ratio 102. Weight per day of age ratio 109. In the 1968-69 winter test at the Eastern Nebraska Beef Cattle Testing Station, his calves were second and third highest indexing Shorthorns. In the 1969-70 test his pen of five calves were top gaining pen. This included the first and third highest individuals. This pen also had a feed conversion record of 6.32 pounds of feed per pound of gain. Lowest of all the purebred bulls on test. A daughter was Champion Shorthorn, 1969 Nebraska State Fair FFA Show.

Lot 1

Cow **S V DUCHESS OF GLOSTER G 44 3371-905**

Calved May 17, 1968 Red and White Tattoo LE-G819; RE-G819
